

SHOPPING CARTS

We offer template shopping carts and custom shopping carts. We can post from one item to a virtually unlimited number of items on your site. All sorts of shipping requirements, delivery options, areas of service, and just about any other function can be accommodated.

The shopping carts are an optional accessory to your website and are available at additional costs, starting from \$25.00 per month. The shopping carts are available only to those who allow us to provide their website needs.

LOGOS

We provide graphics services and can prepare a professional logo for your website and your business.

PHOTOS

We can take your printed photos and scan them for use on your website. We also provide photographers to take on-location photographs.

Special Webs Co. was started in 1999. We have been providing website services continually since that time.

Our initial clients were those just getting into the exploding internet business. Many were established businesses who knew there was something out there that could be of value, but they just did not know how to use it. Many were completely frustrated by sales folks who, though well-intentioned, could only talk in techno-babble. Clients were often intimidated by sales staff who were about the age of their grandchildren. These clients had the money and business savvy to run rather profitable businesses, and they wanted to talk to someone whom they could trust and who would not—intentionally, or unintentionally—confuse them.

As the years have gone by, just about every business sees the need of having a website. This is somewhat analogous to the growth of fax machines. Several years ago, if you did not have a fax number, you were not considered a well established business.

In today's business, if you do not have a website, you are not considered to be a well-established business.

We offer to solve this problem for you.

We offer to do so without confusing you with computer talk and techno-babble.

We would like to visit with you at no charge and assess your needs.

If you are in our service area, a 30 mile radius of Firewheel Town Center in Garland, Texas, we offer to come by your offices. If you prefer or if you are not in the North Texas area, we will be happy to visit with you by phone.

After we visit with you for a few minutes, we can offer suggestions.

Our development time is usually quick. If you need to register a domain name, we can usually accomplish that on the same day. Site development usually is substantially completed within two weeks. Changes and modifications are normal, and the final product should be ready within another week. If all the information is available from you, we can cut this time down. If there is an urgent need, we will work with you to expedite the process.

There are
***NO HIDDEN
COSTS!***

We require an initial payment of \$175.00. This is due before we begin work. It is NOT REFUNDABLE. We will prepare a website for you and will work with you to insure that it meets your needs and your desires. Once it is in place and meets your needs, we will begin to bill you monthly at the \$35.00 per month rate.

We will need information from you so we can develop a website for you.

Some of the things we will need or would normally be appropriate are:

- Business name
- Website name desired (domain name)
- Location of your business (optional)
- Do you want maps to your business
- Contact information
- Products available
- Service area, if applicable
- History of the business, if you like
- Photographs
- Videos

We will take the information provided and start development of your website. Usually, we need to visit with you several times during this process to be sure all the information is correct and that it is properly displayed.

We will spend up to 10 hours of development time to produce your website. This is usually enough time. We have several examples of sites we have done within that time frame. You will NOT be charged for any additional time, unless you approve of it in advance.

We also provide up to ½ hour per month of development time to make updates to your website. Products can change, prices often change, and numerous other things can change that need to be updated to your website.
